

IN THE SPECIFICATION:

Please replace the paragraph beginning on page 25, line 15, with the following rewritten paragraph:

The HTML@HTML.redirect (<URL>) method directs the user's browser to retrieve an HTML page from another URL. <URL> represents a fully declared URL. The method returns nothing. Example usage includes
HTML@HTML.redirect(~~'http://www.dynascript.com'~~) (parameter),
where parameter is a URL address, for example an http world wide web address.
